Why Operations?

Simplify the Daily Workflow

With easy and intuitive task management systems, our platform helps you clarify company workflows and guide your employees' daily routines.

Execute Next-level Operations

Streamline and digitize your internal procedures with checklists and reports to fully optimize how your business does operations.

Build Your Own Processes

Customize and structure your workflows based on company decision trees to support collaboration across your organization.

Do your workforce have difficulties managing their daily tasks?

Our platform provides you with the possibility to simplify the daily workflow by creating an easy and intuitive task management system.

Employees will have a clear overview of all daily tasks, while managers can overlook and track task completion rates.

+600,000

Tasks completed by all clients globally in 2021

Create, assign & track tasks

Add categories, files, and notes

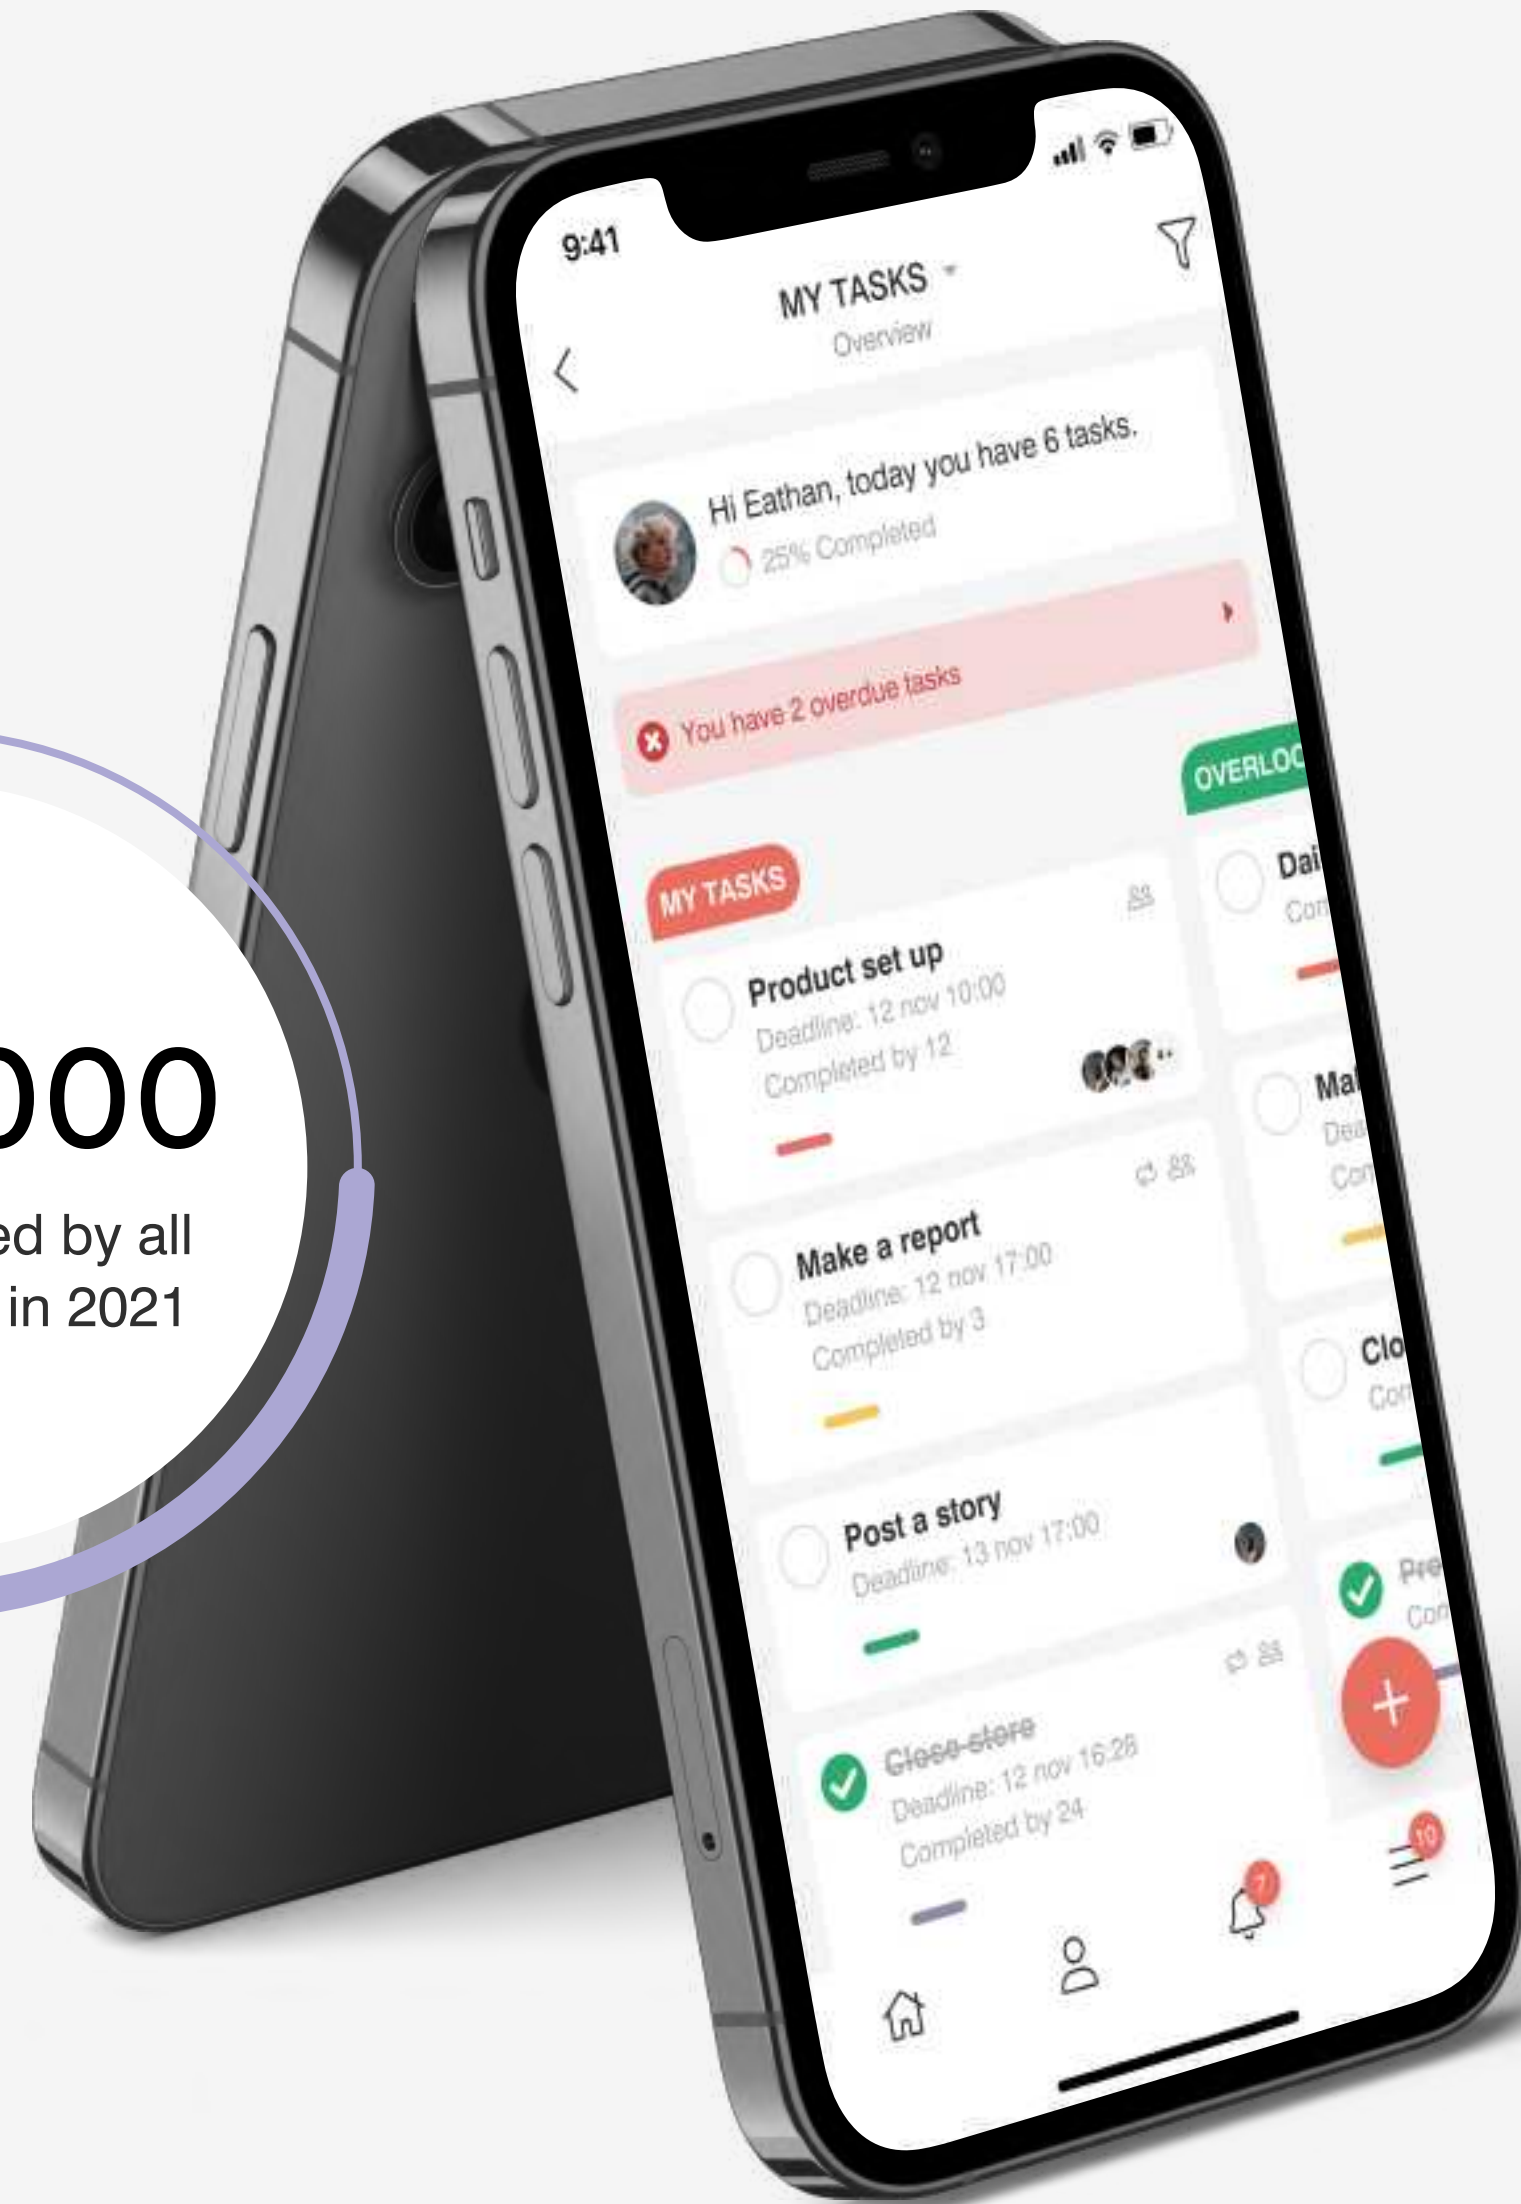

Notify about deadlines

Reward points upon task completion

Various API integrations

Accountability and ease with daily "to-do's"

Previously, Telia HQ sent out tasks to each store via email. However, they found large gaps in communication and no follow-up processes.

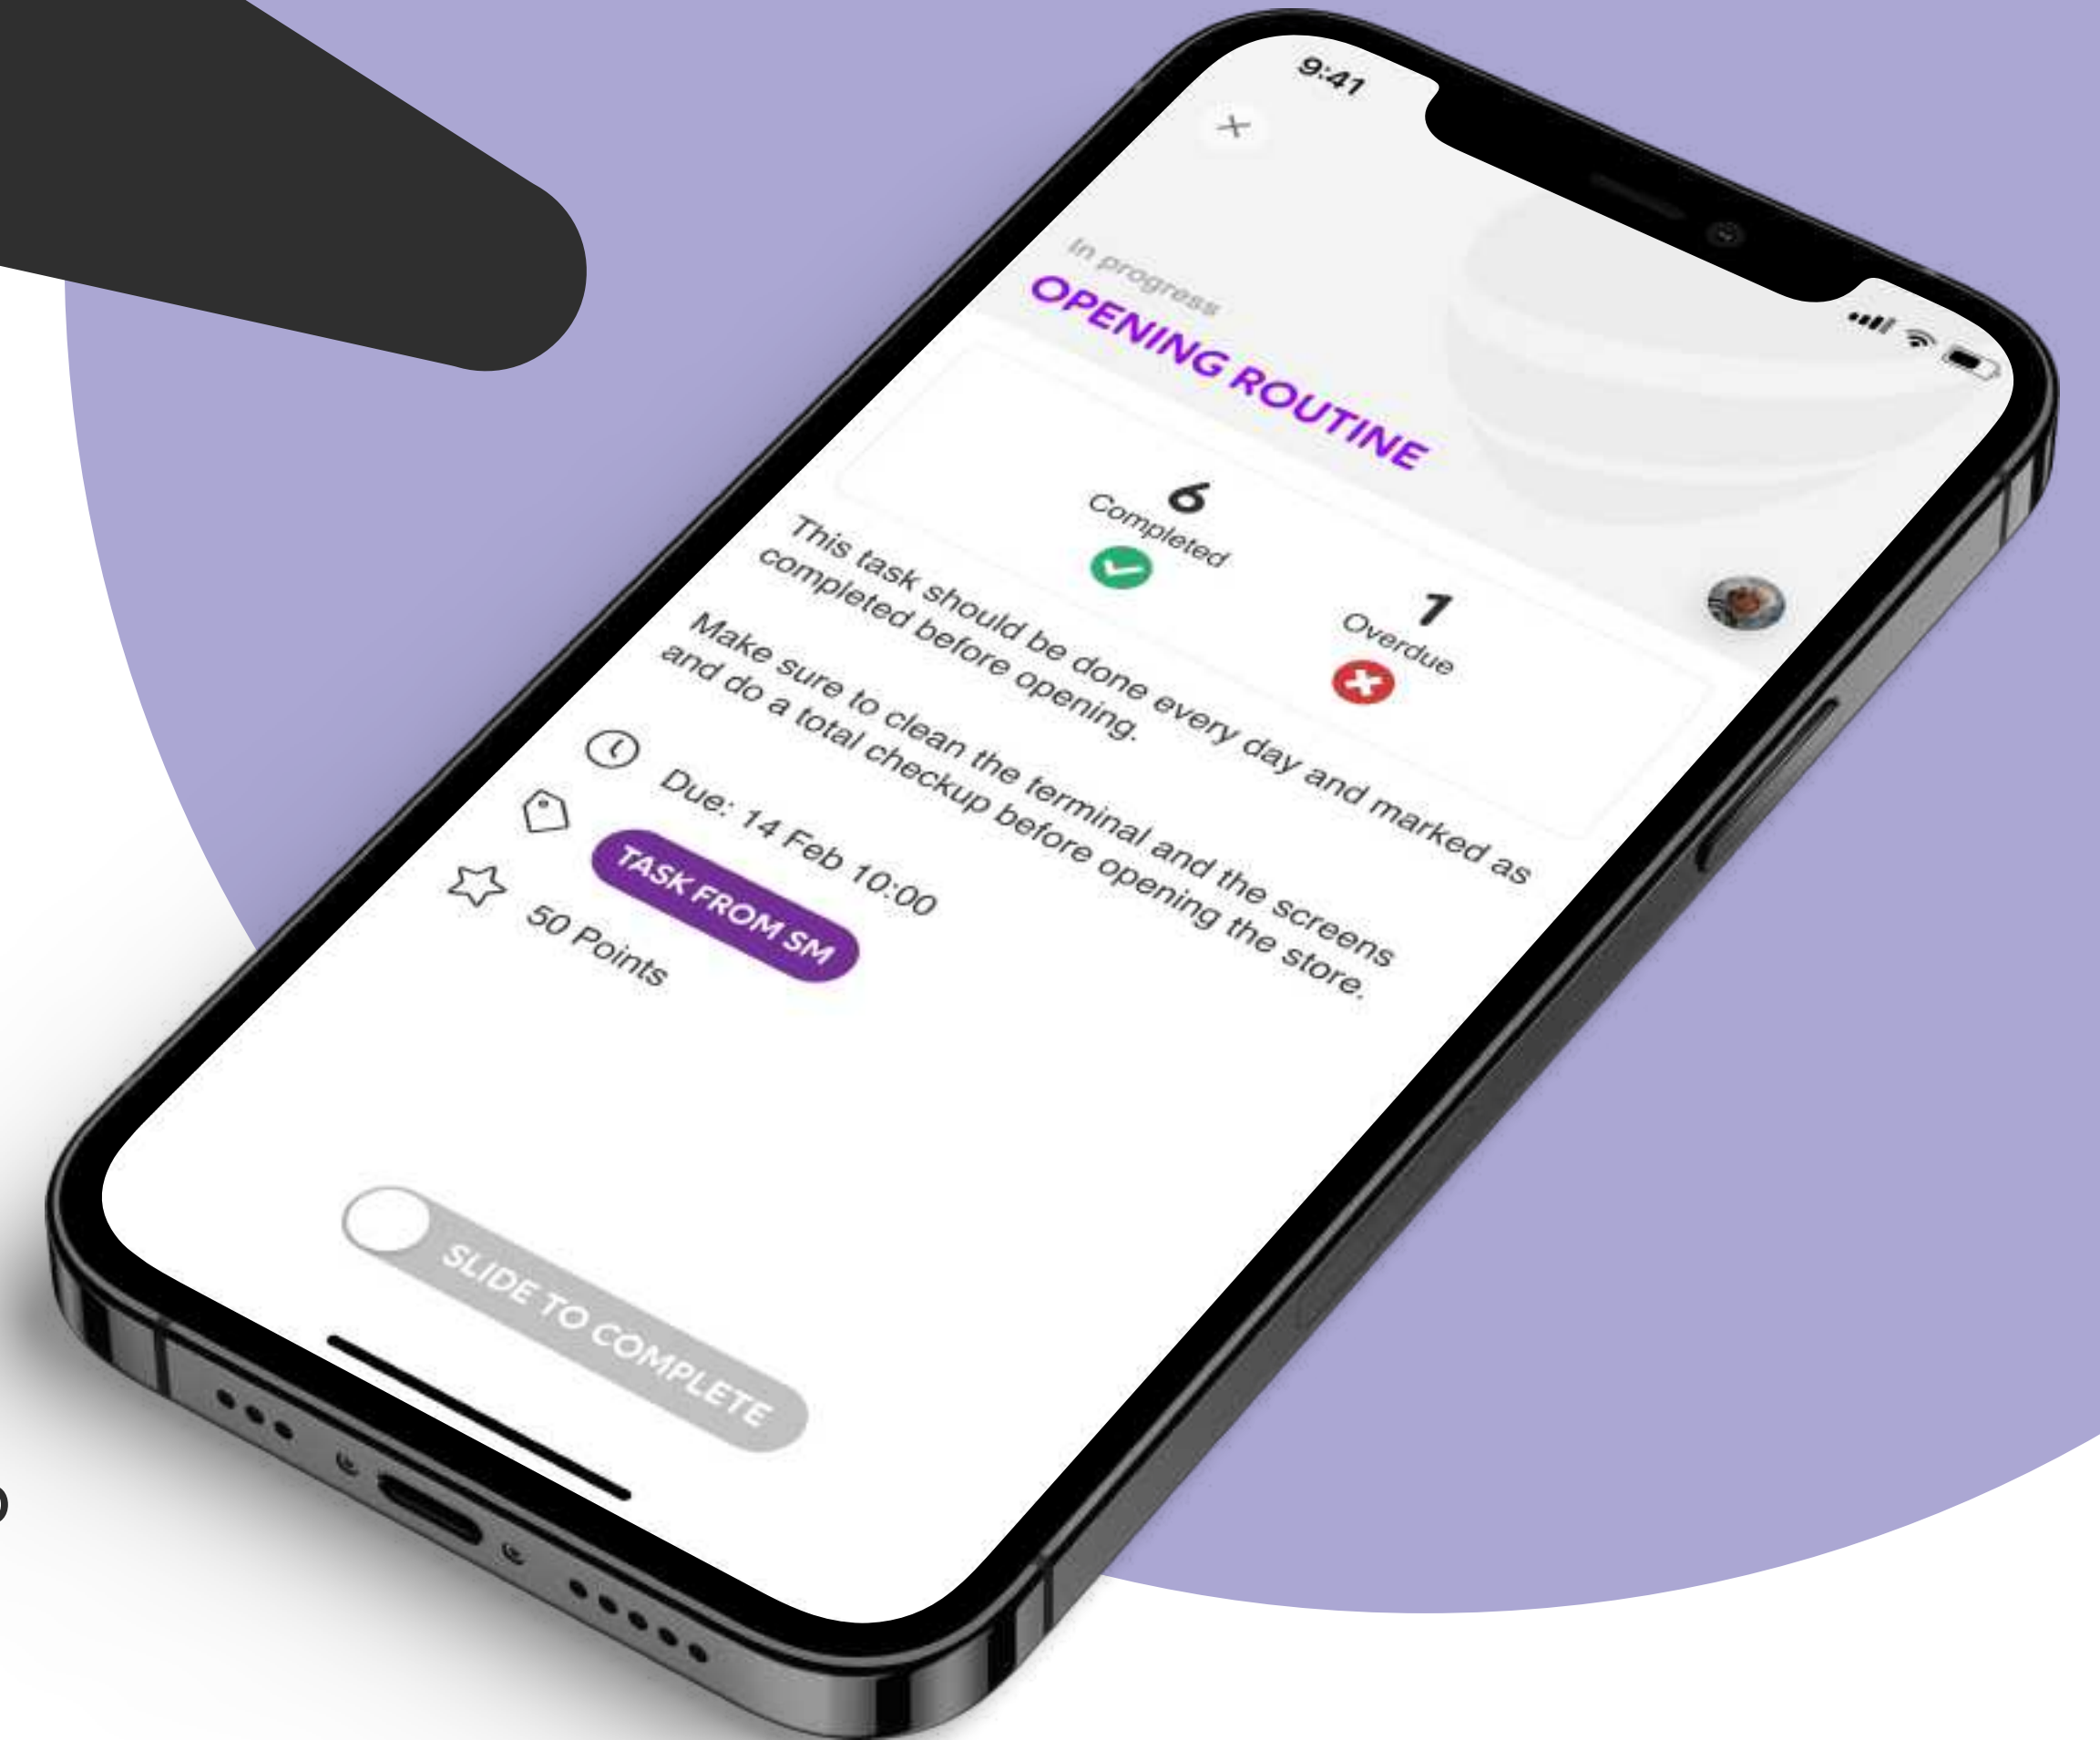

Today, Telia manage all tasks in their app and use the "assign" and "deadlines" functions to ensure task completion. They have experienced a large correlation between task completion rates and stores scoring high on store checks.

"The 'To-Do' tool allows all employees to have an easy overview of their own and others' tasks on a daily basis."

Gustav Björkman Bentzen

PROCESS & PROJECT MANAGER - OPERATIONS & FACILITIES

Does your business rely on too many analogue procedures?

Our platform enables you to target checklists depending on business focuses and generate reports that are filtered by area or role, streamlining and digitizing your internal processes.

Managers can easily spot issues and document them in reports, and employees can then correct any identified issues.

Structure company-wide checklists

Collect data on all report activities

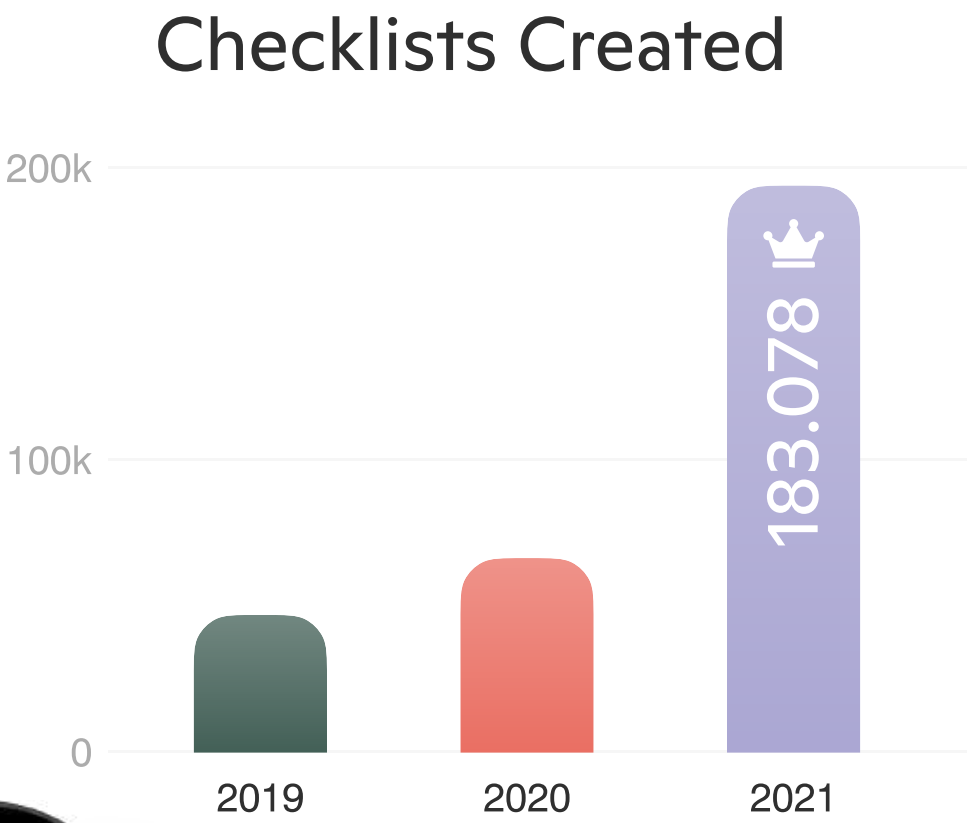

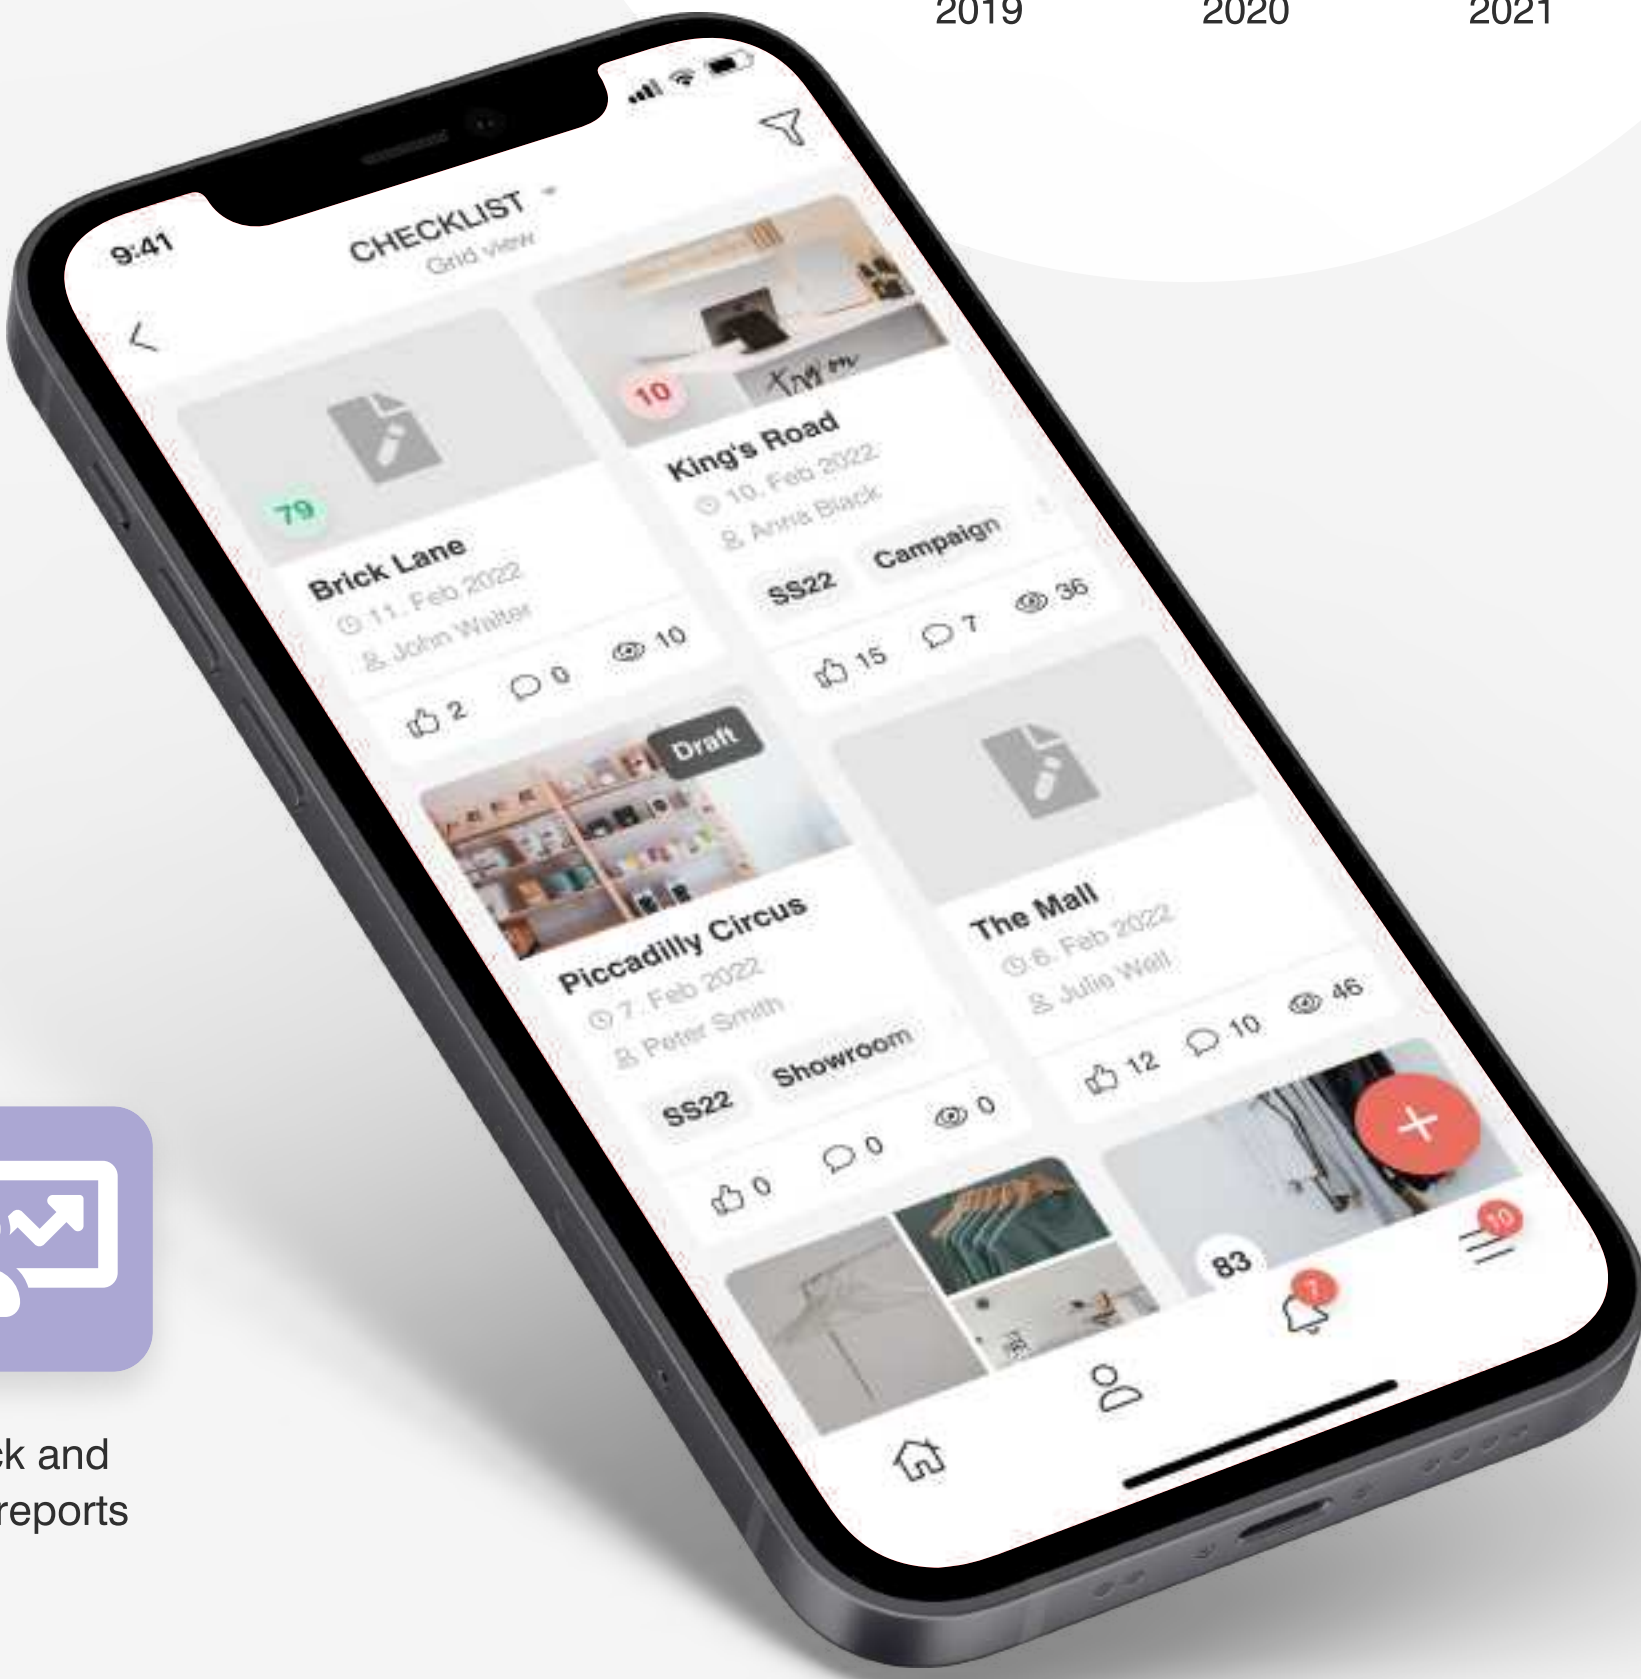

Have a complete overview of reports

Like, view, and comment

Track and find reports

Through the eyes of the customer

Previously, Netto relied on computer-based backroom reporting systems that only management could access. This resulted in a slow workflow as not all employees had access to the reports.

Today, Netto handles all their store-visit reports right on the shop-floor, which are customizable depending on different focuses e.g. food waste. Each District Manager creates a report every time they visit a store and this information is accessible for all employees, increasing customer service and ensuring a great experience for all Netto shoppers.

"Netto employees can now bring their working tool around with them instore, making reporting easy and intuitive."

Birgitte Danielsen
TEAMLEADER - CUSTOMER SERVICE & INTERNAL COMMUNICATION

/ BUILD YOUR OWN PROCESSES

Do you have trouble collaborating due to complex workflows?

Our platform allows you to customize and structure your own workflows based on company flowcharts. Enable interactive feedback loops to support company-wide collaboration.

Employees will only have to report on the areas relevant to them while Managers can oversee and provide feedback.

Collaborate and create together

Monitor and follow-up

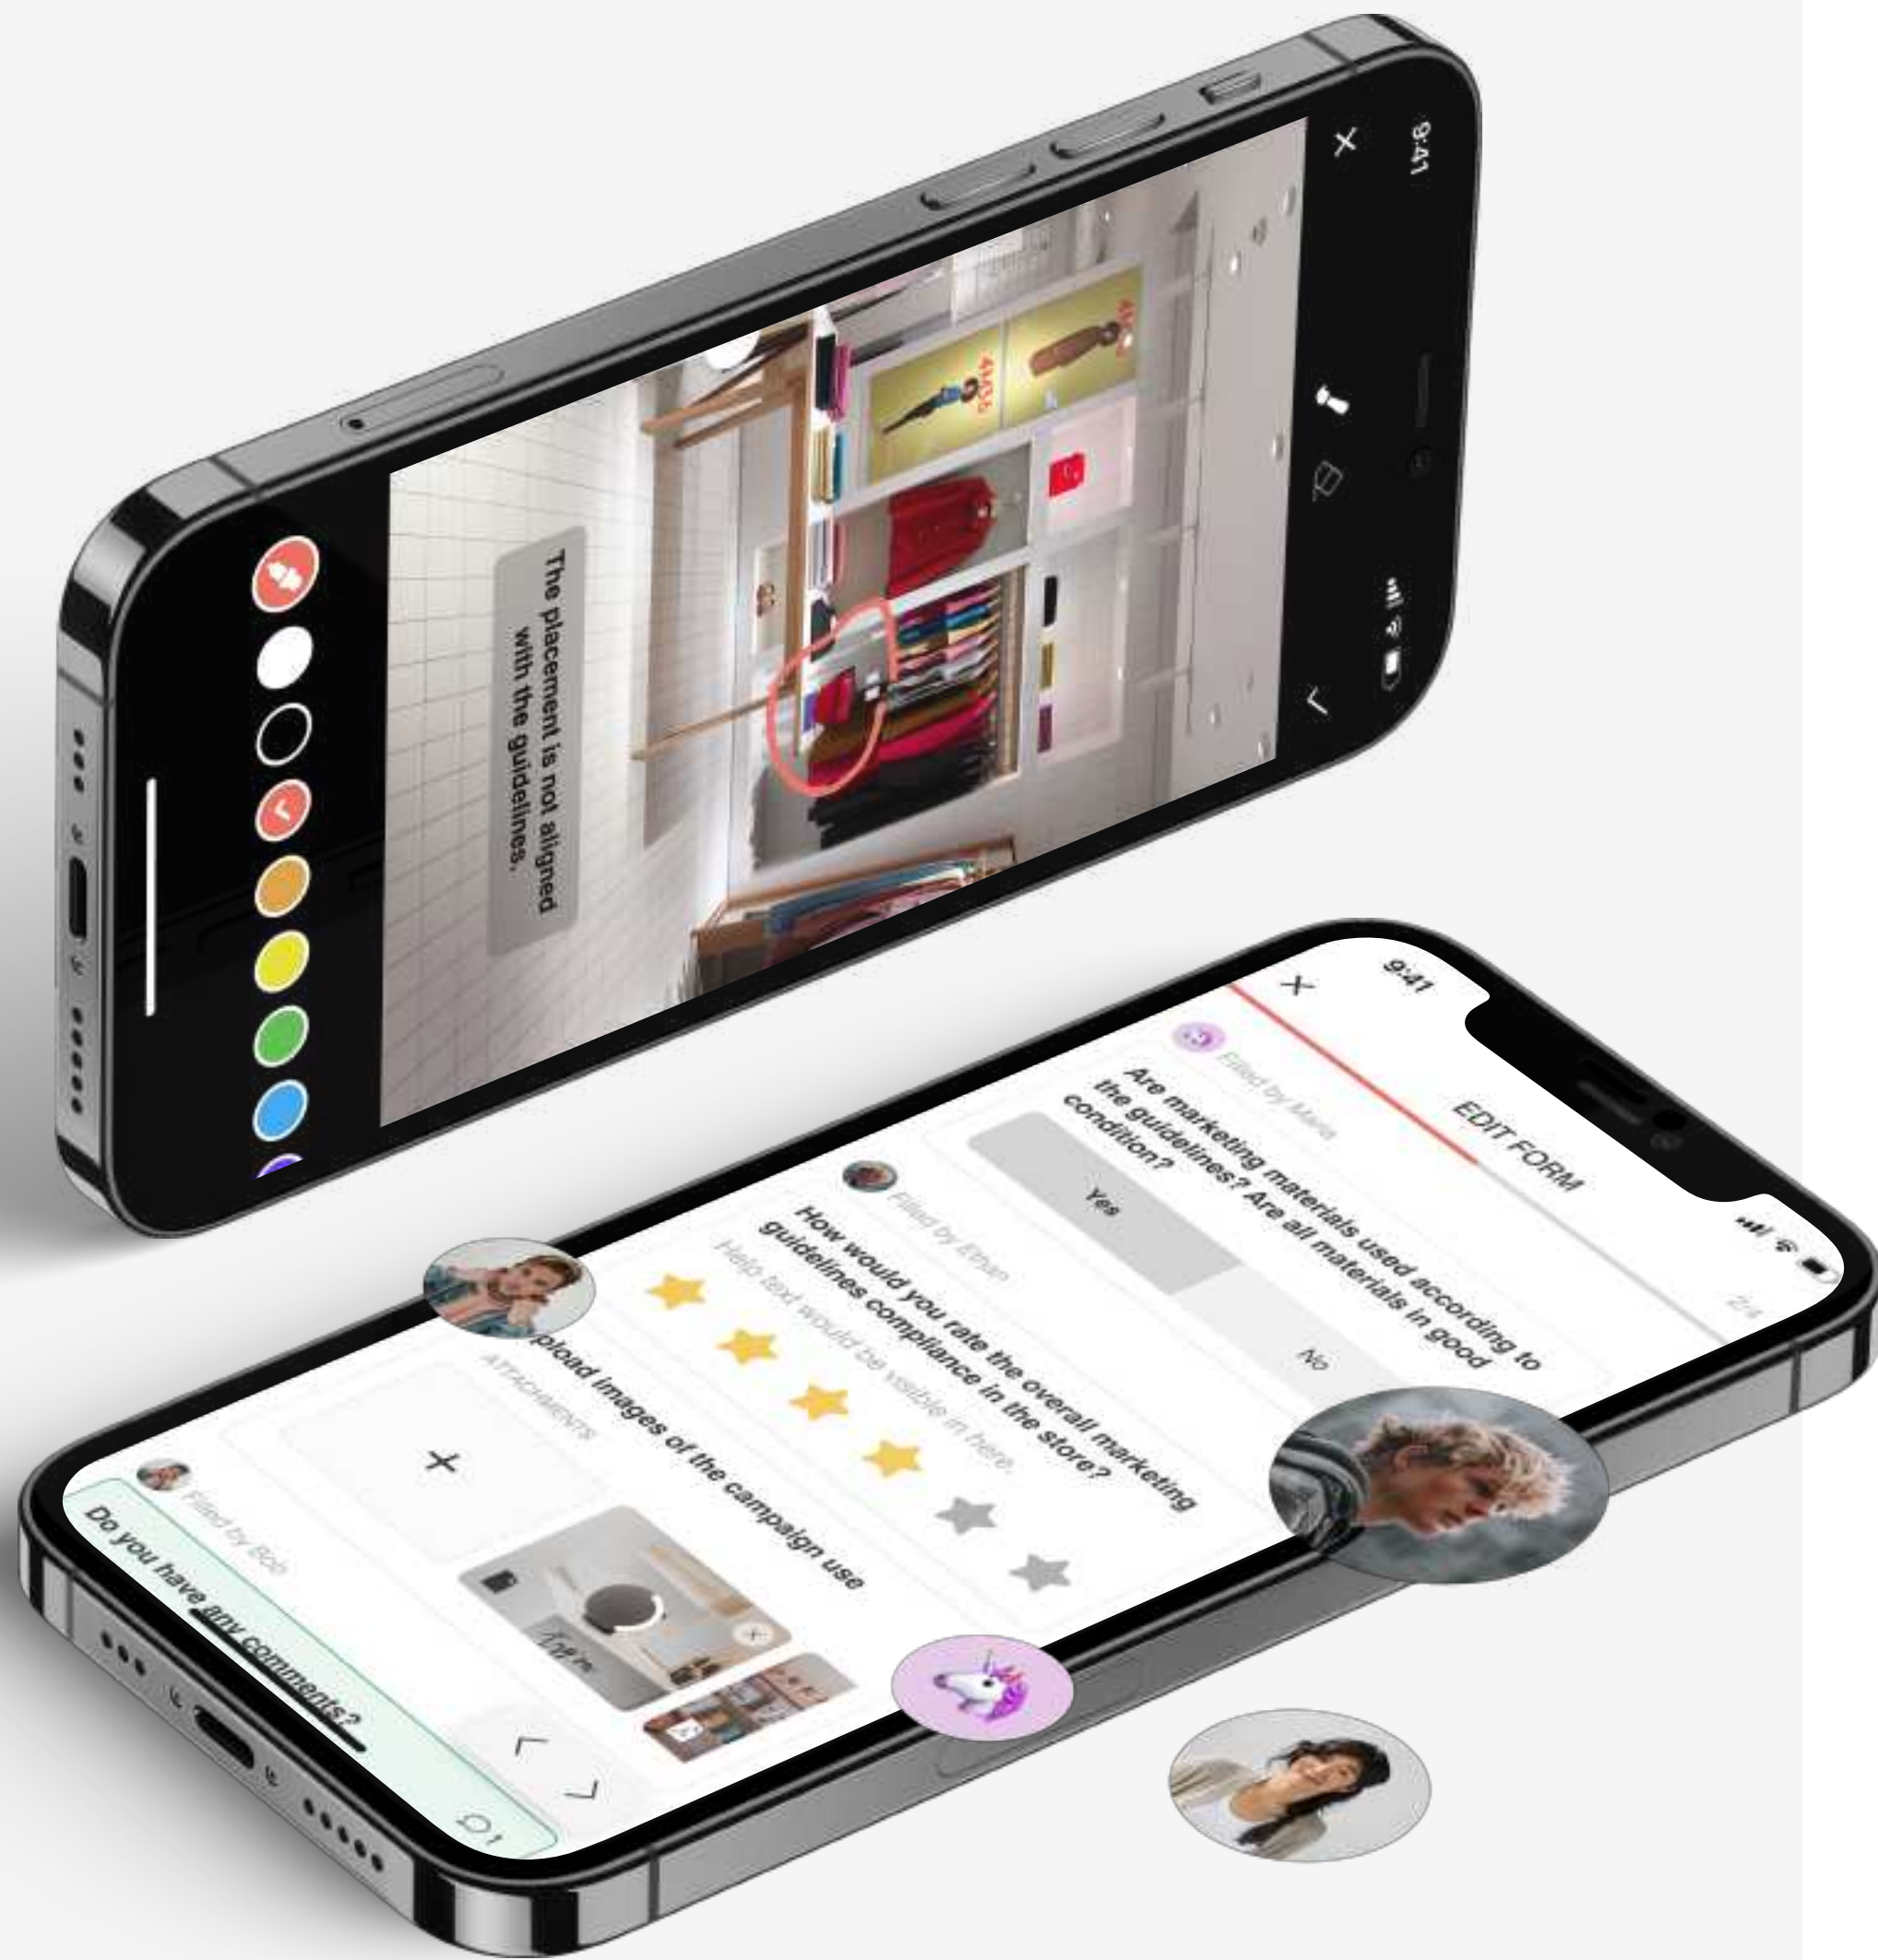

Use wide range of fields and data types

Grade and score reports

Smart notifications and next steps
